Vaccination Information, Request and Consent for Vaccination:

Although the benefits of pet vaccination far outweigh the risks, certain events, some potentially fatal, can be associated with vaccines. Some of these may appear when your pet is vaccinated or occur within 48 hours. However, vaccine reactions are relatively rare. A partial list of adverse reactions which may be associated with vaccination follows: fever (low grade 24-48 hours after vaccination), soreness at injection site, sore joints, vaccine site lumps, vaccine site tumors, and anaphylaxis (acute allergic reaction, i.e. hives, facial swelling, vomiting) which can be potentially fatal if not treated. I request to have my pet vaccinated. I have read and understand the materials provided to me. Any questions about vaccinations have been answered to my satisfaction. I am aware of the potential benefits and risk of vaccinating my pet and am aware that all vaccinations will be provided by a licensed veterinarian. I understand that serious complications after vaccination may occur and I will not hold CEI Clinic liable for any fees or charges incurred as a result.
